RNhealth 
 Management
 A Professional Nursing Corporation

How to Get Started

1. Call us at (949) 383-5700 to set up a phone consultation with one of our Nurse Care Managers.
2. Schedule an assessment to identify the unique issues, both current and potential, that impact health and well-being.
3. After the assessment, we will prepare a written report of our findings, recommendations, suggested priorities, proposed solutions, and next steps.

A professional team of private Nurse Care Managers, specializing in complex healthcare situations

Personalized and Preventative

Who We Are

RN Health Management consists of a professional team of Nurse Care Managers specializing in complex healthcare situations. We provide personalized, prevention-oriented services focused on each client's overall well-being.

What We Do

We work with clients and families, bringing together a comprehensive care management team with expertise in managing and navigating health care and aging issues in a holistic way.

While focusing on clinical concerns, our goal is to promote health and well-being and prevent illness and hospitalization.

Our Services

Healthcare Coordination

We help navigate the healthcare system; organize, attend and interpret medical appointments; and communicate with providers and advocates to protect the health, safety, and rights of the client.

Complex Medical Care Specialty

We specialize in complex medical situations ranging from acute illness to the management of multiple chronic conditions.

Medication Management

We reconcile all medications and help clients take medications safely. The Care Manager creates an Administration Record, tailored to suit the needs of the individual.

Dementia Care Specialty

Our lead RN specializes in dementia care, previously working with the Alzheimer's Association providing guidance and education to individuals, families, and caregivers.

Transitional Support

Whether it is preparing to leave the hospital, joining a rehabilitative program, moving in to an assisted care community, managing a new diagnosis, or initiating palliative care, we are here to help with all types of care transitions.

Our Services (continued)

Resource Recommendations

We are knowledgeable about area resources and have trusted sources for support and referral.

Crisis Management

Whatever the crisis may be - hospitalization, a fall, or an unexpected diagnosis - our clinically experienced team of nurses is available.

Caregiver Support and Training

Caregiver training is client-specific, so our clients receive personalized, seamless coordination of services according to clinical status, medical conditions, and unique needs and personal preferences.

Communication

We regularly communicate with designated responsible parties, and loved ones to ensure they remain involved and informed regarding the details of a client's condition and associated needs.

Professionalism and Integrity

Communication and Coordination

Access and Responsiveness
